BiPC + NEET Biology Practice

Short biology question set

Study snapshot

Try each question first, then use the answer notes to review the core idea.

Key ideas

- Cell structure supports specialised functions.
- Inheritance patterns can be represented with allele symbols.
- Plant transport depends on specialised tissues.
- Homeostasis keeps internal conditions within a useful range.
- Read each question carefully before choosing a response.

Try the questions on page 2 before checking your work.

BiPC + NEET Biology Practice

Quick practice

1. Which cell structure controls selective exchange with the environment?
2. Which tissue transports water in plants?
3. What is the basic structural and functional unit of life?
4. Which blood cells carry most oxygen?
5. Which process releases energy from glucose in cells?

Answer notes

1) Cell membrane
2) Xylem
3) Cell
4) Red blood cells
5) Cellular respiration
