MPC + JEE Mixed Practice

Mathematics, physics, and chemistry

Study snapshot

A short mixed-subject set for practising clear working and unit checks.

Key ideas

- Write the known values before choosing a formula.
- Show intermediate steps so an answer can be checked.
- Use sign and unit conventions consistently.
- Estimate the scale of a result before finalising it.
- Review the answer key after attempting each question.

Try the questions on page 2 before checking your work.

MPC + JEE Mixed Practice

Quick practice

1. Math: Solve 2x + 9 = 23.

2. Physics: A 2 kg object accelerates at 3 m/s^2. Find the net force.

3. Chemistry: Find the molar mass of H2O using H = 1 and O = 16.

4. Math: Find the gradient between (1, 2) and (5, 10).

Answer notes

1) x = 7
2) 6 N
3) 18 g/mol
4) 2

Review the method, then retry any question you missed.
