Algebra & Functions

MPC / JEE quick notes

Study snapshot

A compact review of algebraic expressions, equations, and function notation.

Key ideas

- Combine like terms before solving an equation.
- For a linear equation, keep both sides balanced at every step.
- Factor a quadratic before applying the quadratic formula when possible.
- A function assigns one output to each permitted input.
- Check an answer by substituting it into the original expression.

Try the questions on page 2 before checking your work.

Algebra & Functions

Quick practice

1. Simplify: 3(2x - 1) + 4.

2. Solve: 5x - 7 = 18.

3. Factor: x^2 - 5x + 6.

4. If f(x) = 2x + 3, find f(4).

Answer notes

1) 6x + 1
2) x = 5
3) (x - 2)(x - 3)
4) 11
